

# CAPS Family Fee

**Calculation method:** CAPS implemented a new method for calculating family fees on September 16, 2018. Family fee will be calculated using the new method (shown in **Table 1**) for CAPS cases authorized after September 16, 2018. For cases authorized prior to September 16, 2018, family fee will be recalculated at annual redetermination and when the family reports a change in income, family size, or the number of children in care. The previous calculation method (shown in **Table 2**) will continue to apply to these cases if the new calculation method does not result in lower fees. Under either calculation method, the resulting family fee will be evenly divided among all children in care.

**Quality Rated discount:** Weekly family fee will be discounted by 15% for children at a Quality Rated provider. For cases with multiple providers, the discount only applies to children at Quality Rated providers.

Weekly family fee with discount = weekly family fee x .85, rounded down to whole dollar amount
